

Dear Nova Scotia College of Physiotherapists,

We would like your organization to participate in this important survey on post mastectomy breast reconstruction because your members would provide a clinical perspective that we could benefit from.

About the survey:

This survey was launched on May 1st, 2018 from the Canadian Research Consortium on Post Mastectomy Breast Reconstruction.

This is part of a CIHR funded project aimed to incorporate patient perspectives in breast reconstruction research spearheaded by

Dr. Toni Zhong and colleagues across Canada. This study uses the James Lind Alliance methodology, a new and proven method to bring together patients, care-givers and clinicians to identify critical and unanswered research questions in breast reconstruction.

For more information visit: <http://myreconstruction.ca/nrc.html>

Please take 5 minutes to participate in this important survey:

ENG: <https://www.surveymonkey.com/r/BFP2TPF>

FR: <https://www.surveymonkey.com/r/BFYFWVH>

Please help distribute this survey to the members of your organizations as we would like to hear from more clinicians.

Please let me know if you have any questions.
